

Exhibit 2. Barriers to telehealth use among Community Health Centers not using telehealth

	All CHCs	Urban Only
Lack of reimbursement	36.00%	33.70%
Lack of funding for telehealth equipment	22.80%	23.80%
Lack of training for telehealth services	21.30%	20.20%
Not needed	16.40%	15.60%
Inadequate broadband	11.20%	7.40%
Have not considered/unfamiliar with telehealth	8.00%	7.80%
Other barriers*	9.90%	8.80%

Source : Authors' analysis of the 2018 Uniform Data System

Note : Reported data include CHCs reporting no telehealth use (N=751, or 56% of all CHCs); 276 CHCs in urban areas and 276 CHCs in rural areas. We excluded CHCs located in US territories.

* "Other barriers" was reported as free text in the UDS data and included but was not limited to: lack of staff or resources (1.7%) and having a population that lacks resources to use telehealth (1.7%)
